PART 1: FUNDAMENTALS OF PROMPT ENGINEERING

1. The 5 Elements of Effective Prompts

Every good prompt has these 5 elements:

1. **ROLE:** Who are you asking? (e.g., "You are an expert HR recruiter")
2. **CONTEXT:** What's the situation? (e.g., "We're hiring for a senior QA role")
3. **TASK:** What do you want? (e.g., "Write 10 interview questions")
4. **FORMAT:** How should the response look? (e.g., "Bullet points, JSON, table")
5. **CONSTRAINTS:** Any limits? (e.g., "Keep each question under 50 words")

2. Example: Bad vs Good Prompt

BAD:

```
Write interview questions for a QA role
```

GOOD:

You are an expert HR recruiter with 15+ years hiring QA professionals.

Context: We're hiring for a Senior Test Manager role at a fortune 500 company.

The role involves leading a team of 50+ QA members across multiple countries.

Task: Write 10 behavioral interview questions that assess:

- Leadership ability
- Experience with large-scale transformations
- Technical depth in testing
- Communication skills

Format: Numbered list with follow-up probing questions

Constraints:

- Each question max 50 words
- Focus on STAR method compatibility
- Include difficulty level (Easy/Medium/Hard)

3. Pro Tips

Tip 1: Be Specific

- Bad: "Tell me about SAP SF"
- Good: "Explain SAP SF recruitment module configuration for a 5,000-person organization with 15 countries"

Tip 2: Use Examples

- Include 1-2 examples of what you want
- AI learns from examples better than descriptions

Tip 3: Iterate

- First prompt: 70% useful
- Second prompt (feedback): 85% useful
- Third prompt (refinement): 95% useful

Tip 4: Temperature Setting

- Lower temperature (0.3-0.5): Better for factual, consistent outputs
 - Higher temperature (0.7-1.0): Better for creative, diverse outputs
-

PART 2: RECRUITING & HIRING PROMPTS (12 Prompts)

PART 8: ADVANCED TECHNIQUES

Advanced Technique 1: Chaining Prompts

Complex HR problems often need multiple AI prompts chained together.

Example: Hiring a Senior Manager

Prompt 1: Generate job description

↓

Prompt 2: Create interview questions (based on JD)

↓

Prompt 3: Screen resumes (based on JD requirements)

↓

Prompt 4: Create assessment report

↓

Prompt 5: Generate offer letter

Each prompt builds on the output of the previous one.

Advanced Technique 2: Few-Shot Learning

Show AI examples of what you want before giving the actual task.

Example:

Here are 2 examples of good interview questions:

Example 1:

"Tell me about a time when you had to manage a difficult team member. What was the situation, what did you do, and what was the result?"

Example 2:

"Describe a project that didn't go as planned. How did you handle the setback?"

Now generate 10 more questions in this style for a QA manager role.

Advanced Technique 3: Role-Play Prompts

Get AI to simulate specific personas or conversations.

Example:

I will provide a job candidate's profile.
You role-play as a tough but fair hiring manager interviewer.
Ask tough but fair questions.
Evaluate the candidate's responses.
Provide feedback and a recommendation.

Candidate Profile:

[Provide candidate information]

Advanced Technique 4: Comparative Analysis

Ask AI to compare options and recommend best approach.

Example:

Compare these 3 approaches for improving employee engagement:

1. Quarterly bonuses based on KPIs
2. Flexible work arrangements (remote/hours)
3. Comprehensive wellness program

For each, analyze:

- Cost
- Expected impact (engagement improvement %)
- Implementation timeline
- Risk factors
- ROI

Recommend the best option.

Advanced Technique 5: Iterative Refinement

First pass gets 70% there, but keep refining.

Example:

ROUND 1 (Initial Request):

"Write an employee handbook"

ROUND 2 (Feedback):

"Make it more concise (10 pages max), use bullet points, focus on key policies"

ROUND 3 (Refinement):

"Add real examples for each policy, include FAQ, make tone friendly"

ROUND 4 (Final):

"Format for web display, add table of contents, make downloadable as PDF"

PART 9: TOOL COMPARISON

ChatGPT vs Claude vs Gemini

Feature	ChatGPT 4	Claude 3	Gemini Pro
Strengths	Fast, creative, popular	Thoughtful, nuanced, code	Fast, multimodal, integrated
Best For	Quick ideas, brainstorming	Complex analysis, reasoning	Google integration, speed
Cost	\$20/month	\$20/month	Free/Paid
Word Limit	4K tokens	100K tokens	Standard
Strengths for HR	Quick templates, ideas	Deep analysis, nuance	Gmail/Workspace integration
Best HR Use	Prompt ideas, brainstorm	Complex policy analysis	Process automation

Recommendation:

- Start with ChatGPT (most popular, lots of templates available)
